ASIA CONTAINER FREIGHT RATES SOARED TO RECORD HIGH LEVELS

2020 has been a difficult year overall. Measures to curb the spread of Covid 19 disrupted trade patterns. Capacity crunch and severe shortage of equipment in the Asia Westbound trade routes, resulted in freight rates soaring to record levels.

The lack of capacity created by blank sailings, coupled with the port congestion issues in many countries due to manpower shortages has led to the situation of containers piling up in US and Europe and their slow return to Asia. This initially drove sharp increases in the freight rates for Transpacific routes, Far East to Europe and LATAM trade. It has now spilled over to Intra Asia trade. Due to the prolonged severe shortage of containers in Asia, shipping lines started to prioritise long haul routes, which are more lucrative, redeploying containers and vessels to the long haul routes, further worsening the equipment shortage and capacity issue for Intra Asia.

This unprecedented situation, where container freight rates for many routes within Asia today has more than doubled and continue to rise. It is anticipated that this ascending trend will continue to prevail for some time. The freight level is not expected to be return to normal levels and it will likely be months before we see normalcy in the industry.
